HAIR BEARD EYEBROW TRANSPLANT

A non-surgical procedure, hair transplantation operation is, in which hair follicles are transferred from the donor area, i.e. the back of the scalp, to the receiving area; i.e. the bald areas to be treated. We are using the latest technologies in hair transplant field, by the most qualified experts, to give you the results you desire. We use the best and the latest techniques on **Hair & Beard & Eyebrow Transplant.**

FUE & DHI TECHNIQUE

FUE Technique We offer Mega and Ultimate FUE techniques which allow us to implant up to **8000** grafts!

DHI Technique We use original Choi Pen from South Korea and offer Mega and Extremely DHI techniques which allow us to implant up to **7000** grafts!

STEM CELL TREATMENT

We take samples from your skin, isolate stem cells from the tissue and multiply the follicles in laboratory. Then we inject these stem cells to our patient's bald area on their scalp. This procedure promotes hair growth where stem cells are transplanted.

HOLLYWOOD SMILE

Hollywood smile is a non-surgical cosmetic operation that gives immediate results. It is performed to get rid of the pigmentations and color changes that happen to one's teeth, it's also a very effective way to solve the problem of broken, missing or basically any irregular teeth line.

DENTAL IMPLANT

The doctor replaces the missing teeth with implants that are surgically implanted into the jaw bones, then the doctor covers them with a crown from the top, in a manner that suits and fits the teeth in the mouth naturally.

IN OFFICE LASER WHITENING

In office whitening makes your teeth up to 10 times whiter in just 1 hour. Efficiency is 52% greater than the whitening done only at home. At Turkeyana Clinic, we offer two different types of in office whitening; Zoom and Beyond.

LIPOSUCTION

Liposuction is characterized by its simplicity and low recovery time. The intractable fat, which accumulates in certain areas of the body, is removed by a technique called "Vaser"; Liposuction is can be used to remove intractable fat from many areas of the body, such as the abdomen, thighs and neck.

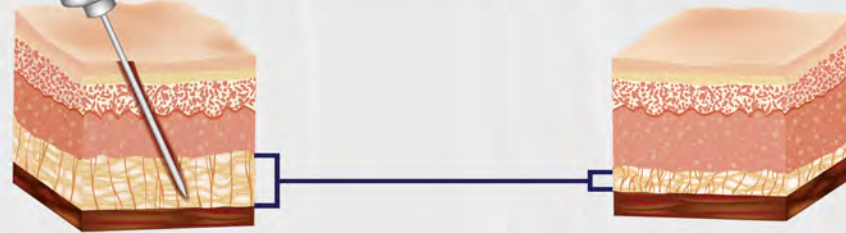

BREAST AUGMENTATION

Breast augmentation operation is a simple and very safe cosmetic procedure, aims to change the shape of the breast by giving it a larger size, as well as giving it a more rounded shape, using certain medical fillings, made of silicone or saline liquid.

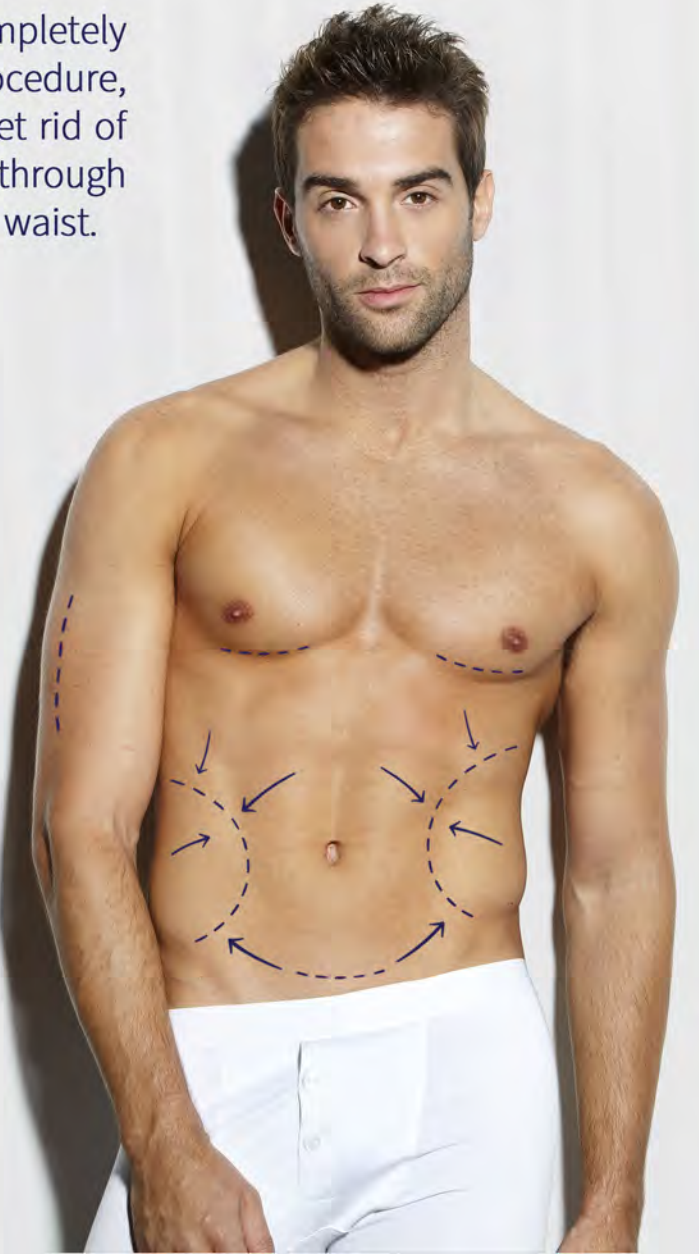

TUMMY TUCK

Abdominoplasty (Tummy Tuck) is a completely safe and simple surgical cosmetic procedure, aims to tighten the muscle wall and get rid of wrinkles, sagging and skin appendages, through removing fat exists in the abdomen and waist.

SIX-PACK Abdominal Etching

Body sculpting operation is developed to shape the body to look more harmonious and slim, for those who would like to get rid of unfavorable fats in their bodies.

GYNECOMASTIA

Gynecomastia surgery is a simple procedure which the doctor makes a small incision on both sides of the chest using the latest cosmetic techniques, removes the fat and the glandular tissue in the breast area, then re-sculpts the chest and gives it a natural look.

LIFTING

Turkeyana Clinic performs Breast, Arm, Face, Lip, Leg, Eyebrow, Eyelid, Forehead, Neck and Butt (Brazilian Butt Lifting) Lifting operations by using the latest techniques and ensures its patients with excellency.

BUTTOCK AUGMENTATION

Buttock augmentation operation is a simple surgery which is sucking fat from different areas of the body where fat is accumulated, then transfer and inject them into the buttocks. There is also another type of buttocks augmentation operation, which is done by fillers; they are silicon fillers placed in the buttocks area to achieve the results of the operation, giving the butt a natural look.

GASTRIC SURGERY

Lose weight in health with Turkeyana Clinic. Here, in Turkeyana Clinic, we offer you four different kinds of Gastric Surgery that will help you to lose weight and get a healthier and firmer body.

GASTRIC BYPASS

Gastric bypass surgery is a surgical procedure whereby the size of the patient's stomach is reduced. The upper part of the stomach is attached and it is immediately diverting to the small intestine, so the food will go only to the upper section of the stomach.

Sleeve

Balloon

Bypass

Botox

GASTRIC SLEEVE

Gastric sleeve operation is one of the most popular weight loss procedures, it is a simple and extremely safe surgery, in which a portion of the stomach is removed, that is about 70% of its original size.

GASTRIC BOTOX

Gastric botox is one of the latest and safest non-surgical solutions for losing weight and getting in shape. It works the same way as Botox works in the face area, when Botox get injected into the stomach, and it relaxes the stomach muscles while significantly reducing stomach contractions.

GASTRIC BALLOON

Gastric balloon operation is a non-surgical cosmetic procedure, aims to reduce the weight, by entering a balloon, which reduces the amount of food eaten, that leads to weight loss.

EYE SURGERY

Turkeyana Beauty Clinic performs iLasik, PRK, Pupilloplasty, Trifocal Lenses, Smart Lenses, Tear Duct Surgery operations in the fully equipped Turkish hospitals with the latest technologies.

IVF TUBE BABY

In vitro fertilization (IVF) is an advanced reproduction technique that is used to assist people with infertility to have a baby. Typically, in this procedure, the patient's eggs and his partner's sperm are used, but sometimes donor eggs or sperm are used depending on the patient's situation.
